FCC/NAB all these rules and regulations, people have to ruin everything for everyone.

XM has uplifted my spirits since the day I bought it. The variety and quick reliable information on any topic I am looking for, weather, traffic, news, comedy, and entertainment, have been extremely useful to me.

I originally bought XM for music which i enjoy its so nice not to be irritated with commercials, when I bought I didnt realize the other sources I would recieve which is weather, traffic, news, comedy and entertainment.

I support everything about XM, 100%!! I have told several about the conviences of XM SATELLITE RADIO, others with demanding professions Dr.'s, lawyers, any profession I think honestly could benefit from SATELLITE RADIO. People in this country, world need to be learning and listening to useful, knowledgable information, and should be able to enjoy something.

FCC/NAB find a new issue to worry about or battle because this no threat to anyone, or is it to just you? What about the others who enjoy it? Why should you have a say over me, you don't like it, but I do! Why should you be able to make the decisions? Have to ruin everthing for everyone.

FCC/NAB find something else to try to ruin, or change. You really can't do, or enjoy anything without someone try to change it!!!!
